### Need to Know For Retailers

- Compact, reliable wireless system for guitars, basses and other instruments with 1/4" output.
- Operating in the 5.8GHz range ensure strong, interference-free connection and cablelike performance with no dropouts, whether on stage or at home.
- The AIRWIRE i58's optimized antenna and anti-interference algorithm ensure superior signal transfer and fewer dropouts, automatically switching to a clearer frequency if needed. Connect up to 4 AIRWIRE i58 sets simultaneously.
- With ultra-low latency (<6ms) and precise frequency response, the AIRWIRE i58 delivers authentic tone and feel. Up to 35 meters transmission range.
- The switchable "cable tone" feature provides the option to emulate the top-end roll-off of traditional cables.

### Full Feature List

- Wireless instrument system for guitars, basses, and other musical instruments with 1/4" output.
- Experience true cable-free freedom without sacrificing tone or playability.
- Operates in the 5.8GHz frequency band for a stronger, interference-free signal.
- Ultra-low latency (<6ms) ensures responsive playability.
- Accurate frequency response (20Hz-20kHz) preserves every detail of the tone.
- Switchable CABLE TONE feature mimics the natural roll-off of standard instrument cables.
- Up to 35 meters transmission range for unrestricted stage movement.
- Supports up to four units operating simultaneously without interference.
- Flip-out plug design for seamless compatibility with instruments, pedals, and amps.
- USB-C rechargeable lithium-ion battery with up to 9 hours of continuous use.
- Auto power-off feature saves battery when inactive for 10 minutes.
- Illuminated star logo for a stylish touch.
- Charging time: less than 2.5 hours
- Dimensions: 6.7 x 3.7 x 2.1 cm.
- Weight: 45g per unit.

## Description

The Blackstar AIRWIRE i58 high integrity wireless instrument system enables a wireless connection for guitars, basses, and many other musical instruments with 1/4" audio outputs.

The system operates in the 5.8GHz range, which is a less crowded frequency band that is unaffected by nearby Wi-Fi signals. The extremely short latency and accurate frequency response ensure authentic tone and feel, allowing you to achieve the best possible signal and response on stage without the restriction of cables.

The Blackstar AIRWIRE i58 comes in a small and compact form factor and will never interfere or distract your playing no matter what instrument you're using. Up to four AIRWIRE i58 sets can be used simultaneously without interference - perfect for a full band.

It offers wireless high-res signal transfer, so there is no treble loss which can occur when using a long cable. However, the system offers a switchable CABLE TONE feature to simulate the tonal effects of a traditional instrument cable.

When fully charged, the system can offer 9 hours of play time at full charge so you'll never have to worry about running out of battery on stage. To save battery, the Receiver will turn off automatically after 10 minutes if no signal is detected.

With a transmission distance of 35 metres, the Wireless Instrument System will have you running around any stage without the fear of losing signal.
