### Need to Know for Retailers

- 10-watt practice amplifier with all-analog Clean and Overdrive channels—perfect for guitarists beginning their journey and looking for a first amp.
- Not restricted to use solely as a guitar amp—equipped with stereo linear speakers that deliver great sound for music, films, and gaming audio.
- Built-in 'tape' echo effect for added depth and ambiance.
- Practice & Record: MP3/Line In for jamming along with tracks. Speaker-emulated headphones / recording output for silent practice or home-recording.
- Stunning vintage design options that suit any home environment.

### Description

Your first amp should sound phenomenal. Meticulously designed by the same UK R&D team behind Blackstar's high-end valve amps, the Debut 10E and 15E models feature a simple-to-use, all-analogue design that delivers stunningly rich and natural clean and overdrive tones—perfect for any guitarist beginning their journey.

A convenient headphone/recording output simulates the tonal character of a guitar speaker cabinet in incredible detail, providing organic tones for silent practice or direct home recording. Instead of a conventional guitar speaker, both amps incorporate stereo linear speakers akin to those found in a HiFi system, so they also double up as great-sounding speakers for music, films, and gaming audio.

Using Blackstar's patented ISF EQ, it's effortless to dial in incredible sounds. Turn it fully counter-clockwise for an American characteristic with tight bottom end and aggressive midrange, or twist it fully clockwise for a 'woody,' British-style tone.

A versatile 'tape' delay effect adds to the immersive playing experience. Short delay times deliver authentic slapback and room ambiance—ideal for country and rock 'n' roll—while longer settings create lush, ambient soundscapes.

Stunning Looks – Debut 10E & 15E's premium covering, fret cloth, and hardware sit elegantly in any home. Available in different colours.
