Need to Know For Retailers

- British-voiced, premium 10-watt, single-ended Class A valve amplifier with a 12" Celestion speaker. Focus on simplicity and tone. Perfect for studio, practice, and small gigs.
- Classic British combination of an ECC83 preamp stage paired with an EL34 power stage for authentic British clean tones, crunch, and powerful leads.
- Clean and footswitchable Boost channels, with studio-quality, custom-voiced reverb inspired by iconic vintage amp reverb tanks.
- Cabinet-emulated line output for silent practice and recording, with the signal taken after the power amp to capture power valve breakup when cranked.
- Vintage in tone and style, the premium green Tolex and silver birch fret cloth give a timeless British look.

Full Feature List

- Simple 10-Watt Class A, single-ended EL34 valve combo amplifier

- 3 Speaker Outputs: 1x 16 Ohm, 1x 8 Ohm, 2x 16 Ohm
- Elegant vintage green tolex with silver birch fret for a timeless aesthetic
- Dimensions (H x W x D): 47.3 x 42.1 x 25.1 cm
- Weight: 14.7 kg
- Designed by Blackstar UK

Description

The Blackstar TV-10 B provides all the grit, growl, and mid-pushed character that is so iconically British and sought after by players all around the world. The amp is simple yet versatile, with plug-and-play tones ready to go right out of the box. Designed for home and studio use, the TV-10 B prioritizes simplicity and tonality, allowing players to quickly dial in their sound when inspiration strikes.

The TV-10 B is powered by the classic British combination of an ECC83 preamp stage paired with an EL34 power stage, driven through a 12" Celestion speaker. Featuring two footswitchable voices and Blackstar's custom-voiced reverb, it creates a dynamic playing experience that effortlessly transitions between full, warm clean tones and classic British crunch.

The distinctive character of this single-ended valve amp comes from the way its power stage clips, bringing out the nuances of the chosen power amp valve. The EL34 power valve produces characteristically full, smooth cleans and a classic British boost that blooms when pushed hard using the Master Volume.

The signal for the emulated line output is taken after the power amp, allowing players to capture and record the tonal characteristics of the Class A-configured EL34 power valve and output transformer being pushed into saturation, directly into a recording or mixing device via a stereo/TRS jack cable.

Blackstar's custom-designed digital reverb is voiced for guitar players. Through meticulous R&D and listening to vintage reference units, Blackstar has faithfully captured the tone of the best valve amplifier reverb tanks.

Vintage in tone and style, the premium green Tolex and 'silver birch' fret cloth give a timeless British look. The TV-10 B looks fantastic in the studio or the home, and its compact design makes it perfect for smaller stages.
