

CRAZY TUBE CIRCUITS MIRAGE

Dual-Engine Reverb Workstation

- Item: 67331
- EAN Number: 5214001261499
- Packaging Dimensions: 14.8 x 12.3 x 7.3 cm
- Weight: 0.56 kg
- [Images](#) | [Translations](#) | [User Manual](#)

Need to know for retailers

- Dual independent reverb engines. Run two fully independent engines with dedicated hands-on control per side. Create lush, layered soundscapes in real time.
- Flexible routing & control. Autonomous switching - flexible routing setup: mono in series, stereo, independent dual mono, or mono to stereo configurations - easily adapts to complex gear rigs or in the studio.
- 16 studio-grade algorithms per reverb engine. From classic reverb types found in nature or vintage gear up to surreal, ambient tools designed for textures, pitch shis, modulation, and immersive environments
- Built for real-time performance. Expression input and footswitch morphing allow on-the-fly swells, shimmer bursts, gated punches, or infinite freeze effects.
- Makes reverb inspiring and playable. From subtle realism to massive dreamscapes, Mirage unlocks dramatic textures and expressive sound design.

Product Features

- Dual independent reverb engines
- Dedicated controls per engine for hands-on shaping.
- Flexible routing: mono in series, stereo, independent dual mono, mono to stereo
- Send/return loop between engines for inserting additional pedals
- 16 total algorithms split into two intuitive banks: vintage/classic and ambient/experimental.
- Classic bank: spring, plate, cathedral, room, gated, inchindown and more
- Ambient bank: various shimmer types, echo verbs, freeze, infinite, pitch shift
- Studio-grade signal path with high headroom, clarity, and detail.
- Full analog-dry signal path.
- Multiple footswitch modes: toggle engines independently or perform real-time morphing
- Internal switches for routing and bypass mode selection.
- Menu-free user interface for instant creative results
- Power requirement: 9V, 210mA.
- Click-less true bypass design via relay or buffered bypass with trails.
- Power-up state can be saved for footswitches
- Top mounted jacks.
- Dark Abyss Blue die-cast enclosure.
- Compact, rugged enclosure for road use without sacrificing control layout.
- Dimensions: 12.3 x 9.7 x 5.4 cm.
- Weight 0.46 kg.
- Made in Greece.

Description

Mirage – the Master of Reflections by Crazy Tube Circuits is a dual-engine reverb workstation that redefines sonic depth and flexibility.

With two fully independent reverb processors (R1 and R2), each offering 16 high-quality algorithms, Mirage can deliver everything from vintage realism to cinematic ambience.

With flexible routing options and autonomous control over each engine, Mirage lets you:

- Run distinct reverbs on the left and right stereo channels.
- Cascade the engines in series for layered, evolving spaces.
- Shape sonic environments that range from subtle and natural to massive and surreal.

Whether dialing in tight spring slapbacks, massive cathedral echoes, or surreal shimmer-scapes with modulation and pitch shifts, Mirage responds intuitively with real-time performance tools like expression pedal control and footswitch-based parameter morphing. Its send/return loop between engines expands creative possibilities by allowing pedal insertions between reverb stages.

With an analog dry path, studio-grade clarity, and a menu-free user interface, Mirage is as direct as it is deep—equally at home on a pedalboard, in a synth rig, or on a studio desk return.

Mirage puts studio-grade reverb control at your feet - with endless room for creativity.
