- Works with 25 V internally for super high dynamics
- Controls: Volume, Bass, Treble, Sens, Middle, Mid-Shift, Presence
- Input: 1x ¼" Jack
- Output: 1x ¼" Jack
- Footswitch: on/off
- Powered via standard 9V power supply or 9V battery

Description

From the western twang of the pedal steel to the ominous depths of death metal, Peavey has had a hand in shaping the sound of guitar-driven music for well over a half-century. Now, in a series of compact pedals, Peavey gifts players with one-to-one re-creations of the famed preamp sections of classic Peavey amps.

The Peavey Session-LTD 400 preamp pedal is an honest re-creation of the preamp circuit housed in the original Session 400, a steel guitar amplifier heralded for its clarity, power, and dynamic range. This stompbox pays homage to the 1974 classic by featuring a 3-band EQ with mid-shift controls and input Volume, Presence, and Sensitivity adjustment knobs that provide guitarist with a surgical level of tonal precision when it comes to dialing in articulate cleans or navigating spaces with available sonic headroom.

With the entirety of its preamp pedal line, Peavey has opened the door for guitarists to explore the sounds that helped define notable eras of rock, metal, country, blues, and beyond. Whether you rock an expansive rig or opt for a more modest approach, the Peavey Session-LTD 400 preamp pedal adds equal doses of brightness, depth, and control.
