Need to Know For Retailers

- American voiced, premium, 10 Watt single-ended, Class A valve amplifier perfect for studio, practice and small gigs.
- 6L6 power valve for classic American glassy clean tones, crunchy overdrives and smooth mid-range leads. Ability to push the power stage into saturation at manageable volume levels.
- Clean and footswitchable Drive channels with specially-voiced digital reverb, referencing iconic vintage amp reverb tanks.
- Cabinet emulated line output for silent practice and recording, with the signal taken after the power amp for capturing power valve breakup when cranked.
- Vintage in tone and style, the premium cream tolex and basketweave fret give a sleek, boutique look.

- Ideal for home, studio, or small gigs.
- Dimensions (H x W x D): 47.3 x 42.1 x 25.1 cm.
- Weight: 14.7 kg.
- Designed by Blackstar UK.

Description

The Blackstar TV-10 A is a premium 10W Class A valve combo amplifier designed to deliver the ultimate in classic American tones. With its ECC83 preamp valve and 6L6 power valve, the TV-10 A references the feel and sound of legendary low-wattage USA valve amps. It features a 12" Celestion speaker, offering a dynamic playing experience that effortlessly transitions between glassy clean tones and crunchy overdrives.

The TV-10 A's power stage clips in a way that brings out the nuances of the 6L6 valve, producing a bright clean sound and a hot lead tone with natural compression when pushed. The emulated line output captures the tonal characteristics of the Class A configured 6L6 power valve and output transformer, making it ideal for recording or silent practice. Custom-designed digital reverb, voiced specifically for guitar players, adds depth and dimension to your sound.

Vintage in tone and style, the TV-10 A is wrapped in premium cream tolex and features a basketweave fret, making it a sleek addition to any setup. Its compact design ensures it's perfect for home, studio, or small stage performances. This amp is the perfect plug-and-play solution for musicians seeking authentic American valve tones with modern versatility.
