

PEAVEY VYPYR X2 (Modeling Guitar Amp Combo)

- Item: 58677
- EAN: 0014367663891
- Packaging dimensions : 26.9 x 46.5 x 55.9 cm
- Weight: 13.8 kg
- [Pictures](#) | [Translations](#) | [User Manual](#)

Need to know for Retailers

- Latest evolution of industry changing VYPYR Series
- 2021 VYPYR X Series includes 3 modeling-combos:
 - VYPYR X1 (20-Watts, 8" speaker)
 - **VYPYR X2 (40-Watts, 12" speaker)**
 - VYPYR X3 (100-Watts, 12" speaker)
- 36 on-board amps + 12 stompbox models + 11 effects + global delay & reverb
- Analog Preamp for authentic tube-like overdrive (patented TransTube® technology)
- 10 Instrument models (e.g. acoustic, bass, sitar, 12-string, synth)
- Designed to work with E-Guitar, E-Bass & Acoustic Guitar (variable input)
- Dedicated iOS Remote Control App via Bluetooth + audio streaming via BT
- USB 3.0 audio recording and remote control via dedicated MAC/PAC edit software

Full Feature List

- Multi-instrumental modeling guitar amp combo
- 40 Watts RMS output power
- 12" custom-voiced heavy-duty speaker
- Designed for use with electric, acoustic and bass guitars
- Patented analog TransTube technology for authentic tube-like distortion
- Built-in instrument modelling with 10 models such as acoustic, bass, sitar, 12-string or synth
- 36 on-board amp models including 6 acoustic and 6 bass amp models
- 25 total on-board effects
- 12 stompbox effects with dual parameter control
- 11 on-board effects with dual parameter control
- Global reverb and delay with tap tempo control
- On-board 30 sec looper with optional Sanpera I or II footswitch controller
- Up to 5 effects simultaneously
- 16 user assignable presets
- Enhanced chromatic tuner
- Bluetooth audio streaming for jamming, practicing or just listening to your favorite songs
- Wireless remote control through Bluetooth with dedicated iOS App
- USB 3.0 for audio recording and remote-control via PC/MAC VYPYR Edit Software
- Studio-quality Headphone output for silent practicing
- 3.5mm AUX in for connecting external audio sources
- WYSIWYG („what you see is what you get“) controls
- Custom cabinet design for enhanced low-end response
- Lightweight and portable
- Designed by Peavey USA

Description

Peavey Electronics introduced the original VYPYR guitar amplifier in 2008. This game changing amplifier launched many industry firsts, such as first guitar amplifier to have on-board USB, stompbox presets, looper, 5 effect simultaneous operation, and TransTube®/digital hybrid technology. In 2012 Peavey raised the bar again with the VYPYR VIP, the world's first Variable Instrument Performance amp. For the first time one amplifier could be used for electric, bass, and acoustic guitar. In addition, for the first time ever, we introduced instrument models to an already feature-packed amplifier.

Now continuing the tradition of innovation and excellence, Peavey launches the VYPYR X modeling amplifier. This latest evolution of the groundbreaking VYPYR series features updated styling, superior cabinet design and acoustic performance, and improved TransTube technology.

Analog distortion

Each VYPYR® X is equipped with Peavey's exclusive TransTube® technology. This true analog distortion not only sounds better, it leaves the amplifier's processing power dedicated to the effects, allowing the VYPYR X to run up to 5 effects simultaneously. When playing live nothing "cuts through the mix" like a VYPYR. Many modeling amps simply can't be heard in a live setting because of their poor digital distortion and practice amp EQ. TransTube technology is designed analog to emulate real tubes, and sits perfectly in the mix in a live environment.

Variable Instrument Input

Thanks to our revolutionary cabinet design and world class processing, users can switch from electric guitar to bass or acoustic on the same amplifier. One amp for all of your performance needs.

Instrument models

Make your electric sound like an acoustic or bass guitar, or on the VYPYR X2 and X3 up to 10 different instrument models (e.g. sitar, 7-string, synth, 12-string, baritone).

Bluetooth VYPYR X Control

Control your VYPYR X2 or X3 remotely with on-board Bluetooth wireless remote control! via Peavey's exclusive VYPYR control app for iOS devices. Now change and store all your favorite presets remotely. Stream audio in, play to your favorite backing tracks, or just sit back and enjoy streaming your favorite music.

Amp Accessible Operation

Many competitors claim their amps have multiple effects and models, but most of them are not fully functional without the use of external software. With the VYPYR X you can access ANY of the features of the amp, right from the front of the amp itself or with the use of a footswitch in the case of the looper. This is a key advantage found on all VYPYR X amplifiers. No hooking up a computer in order to edit your favorite preset or swap out an effect, you can do it right from the amplifier itself.

Packed with amplifiers & effects

Purchased individually the amps and effects in the VYPYR amp could cost well over \$50,000. Our VYPYR series is an unbelievable value. We use the same technology found in stompbox pedals that cost almost as much as a VYPYR for a single effect. For the same amount of money we give you 26 effects in addition to 10 instrument models and 36 amplifier models.

WYSIWYG Interface

Another Peavey original, the WYSIWYG (What you see is what you get) interface allows users to identify the position of the knobs by looking at the amplifier. When a modeling amp changes presets the settings on the knobs change with it; however, on most amps the position of the

knob no longer corresponds with the actual setting. This can cause confusion and mistakes that result in unwanted outcomes. With the VYPYR, the LEDs around the knob always indicate what position it is in relative to the current preset. Simply a better solution.
