

# LONDON 10 ROOM KIT

The London 10™ room kit is designed for rooms up to approximately 120 sq ft (11.1 sq m), or can be combined with other products to treat larger spaces. Whether you are building a recording studio, home theater or boardroom, this easy to use kit is a perfect place to start.

The London 10 contains select Broadway panels that tackle problems affecting any room, such as primary reflections, flutter echo, and standing waves. In addition to acoustic panels, each London 10 room kit includes the corresponding mounting hardware and instructions for easy installation.

Broadway panels are made from high-density 6lb per cubic foot glass wool, offering nearly five times greater absorption than typical low cost foam alternatives. This means that you get more absorption with fewer panels, while assuring an even absorption curve throughout the frequency range. The London 10 room kit is available in black, beige or grey fabric or in Absolute White™ paintable finish. 20 panels included.
