SONNET 120 Black

SONNET 120 Blonde

Description

The new Sonnet line amplifies the natural response of your acoustic instrument capturing every nuance of its tone and your performance.

Each model has two independent channels, microphone and instrument, with their own EQ and reverb level settings and a host of player-friendly features such as XLR and USB outputs.

The addition of Bluetooth audio playback makes them the ideal solution for solo performers or duos.

Hear the natural tone of your acoustic instrument through the unique Natural 120 speaker. The essence of a natural acoustic tone is delivered by the custom voiced Natural speaker. Hear the clarity and authenticity of your acoustic tone the way nature intended.

These amps are powerful, light and compact, and the built-in tilt-back stand projects the sound for any performance.

'Finally, an amp that can reproduce the full spectrum of sound of acoustic instruments. All I hear is my sound.'
(Jon Gomm, Acoustic Guitar virtuoso)

Expand Your Rig

- SA-2 35mm PA stand adaptor.
- FS-17 2-way footswitch.
