- Soft bag included

Description

Peavey returns to the roots of an American tradition with the introduction of the Delta Woods acoustic guitars. The DW series guitars are designed to be the best-sounding, easiest-playing, full-size acoustic guitars Peavey has ever built. The new models are made using only high-end materials and a minimalistic satin finish, resulting in excellent tone and volume.

Whether players are casually strumming a traditional 12-bar blues riff or exercising modern fingerpicking techniques, Peavey's Delta Woods acoustic guitars deliver rich tonal resonance and premium playability.

The Delta Woods DW-1 offers a gorgeous spruce top with mahogany back and sides for premium tone. Hand-carved bracing provides even tone distribution throughout the guitar's range. The DW-1 also has a bound fingerboard and body along with a fanciful rosette, rosewood fretboard, and pearloid dot inlays for a premium look and feel.

Other high-end appointments include sealed tuning machines for precise and accurate tuning, pre-installed strap buttons, a compensated saddle for ideal intonation, and a wood truss rod cover for the dual-action truss rod, designed to ensure a lifetime of playability.
