

Ziggy v2 is a British flavored dual overdrive / distortion designed with discreet MOSFET gain stages to respond like a tube amp with ultra touch sensitivity so that you can control everything from your guitar's volume knob and pick attack. A silent relay true-bypass switching circuit selects between 2 separate overdrive/distortion channels – low and high gain - each with its own controls for ultimate versatility. Gain knobs on both channels also act as voicing controls adding more bass as you turn clockwise, choosing from jangly and sparkling clean to thick crunch while tone knobs behave as a presence control adding bite to your tone. An internal circuitry provides 18V DC from a standard 9V DC power supply to ensure maximum headroom and tube like response.

Controls:

**LG footswitch:** engage/disengage low gain channel

**HG footswitch:** engage/disengage hi gain channel

Bottom row (gold print):

**Volume:** set the output of high gain channel. Match to bypass level or boost your amp to extreme territories.

**Tone:** set the high frequency response and dynamics of high gain channel. From smooth (CCW) to bright and aggressive (CW).

**Gain:** set the gain level of high gain channel. from a mild crunch to full tilt British amp style overdriven sound. This control also acts as a voicing control adding low frequencies as you turn clockwise.

Top row:

**Volume:** set the output of low gain channel. Match to bypass level or boost your amp to extreme territories.

**Tone:** set the high frequency response and dynamics of low gain channel. From smooth (CCW) to bright (CW)

**Gain:** set the gain level of low gain channel. From clean to British crunch. This control also acts as a voicing control adding low frequencies as you turn clockwise.

Built with the best components available, features true-bypass via high quality relays and operates with external 9V DC regulated power supply (- center, + ring). Max current consumption 59ma @ 9V DC. Using a power supply of 12V DC or more may cause severe damage to the pedal and void warranty.

**Warranty:** Ziggy v2 comes with 5 years warranty. We will provide service/repair at no cost for all internal parts, within 5 years from date of manufacture - buyer is responsible for shipping costs. This warranty excludes damages done due to misuse or improper handling.
