

## J. ROCKETT HRM V2 HOT RUBBER MONKEY (D-style Overdrive)

- Item: 64348
- EAN: 851236004702
- Packaging Dimensions: 12 x 6.7 x 5.1 cm
- Weight: 0,57 kg
- [Images](#) | [Translations](#) | [User Manual](#)

### Need to Know for Retailers

- Successor of HRM v1 but dramatic improvement when it comes to authenticity and closeness to a real Dumble amplifier
- Based on an ultra-rare, actual (!) Dumble amplifier with HRM mod, distinguishing it from HRM v1, which was based on JRAD's 'Dude V2'
- Developed by J. Rockett after living with the actual Dumble amp for over 2 years, ensuring meticulous craftsmanship.
- Exceptional touch sensitivity, quick responsiveness, and ability to cut through the mix.
- HRM (Hot Rubber Monkey) is a popular modification by Howard Dumble, adding gain stages and tonal options, enhancing versatility and sonic capabilities.

### Product Features

- Overdriven D-style amp sounds with HRM EQ mod
- Developed after a 2-year experience with an actual Dumble amplifier and HRM mod
- Enhanced authenticity with carefully sourced NOS parts
- Controls: Level, Gain, Top End, Midrange
- "Top End" control adjusts the amount of high-frequency bite, contrasting with the low mids
- "Midrange" control handles crucial guitar midrange frequencies and adds thickness to the low mids
- HRM mod creates low-mid centric, throaty guitar frequencies
- Replicates touch sensitivity and quick response of a real Dumble amplifier
- Provides enormous "cut through the mix" abilities
- Bloom and feedback at lower gain settings for an authentic feel.
- Achieves outstanding Tube Screamer sounds with enhanced EQ control
- Ultra-rugged "built like a tank" steel enclosure
- Product dimensions : 10.2 x 5.7 x 3.2 cm
- Product Weight: 0.45 kg
- Power requirement : 9V DC, 30 mA
- Hand built in sunny California, USA

## Description

The HRM V2 is designed to achieve the overdriven sounds of a D style amp with the HRM EQ mod. This EQ mod creates a very low-mid centric throaty sound where the guitar frequencies live. The touch sensitivity and quickness gives the effect of immediacy and cuts through the mix. For this V2 version we were able to spend about a 2 years living with an actual Dumble Amplifier with the HRM EQ mod. This allowed us to really drill down on the subtle nuances to make an even better version than the previous HRM. This pedal, even at lower gain settings, will bloom and feedback making it feel like the real thing. We found some very nice NOS parts that enhance the authenticity of the V2 version and most importantly it makes it fun to play. One of the great happy accidents is the pedal can achieve some of THE best Tube Screamer sounds you could ask for with more control over the EQ.
