

WALRUS AUDIO CANVAS TUNER

- Item: 64501
- EAN: 810424035010
- Packaging Dimensions: 14 x 7.6 x 6.4 cm
- Weight: 0,32 kg
- [Images](#) | [Translations](#) | [User Manual](#)

Need to Know for Retailers

- Bright 2.8" full-colour TFT LCD display that can be viewed under just about any stage lighting conditions.
- Display orientation can rotate 90, 180 and 270 degrees for limitless pedalboard placement options.
- Needle and strobe tuning modes with +/- 0.1 cent accuracy
- Tune Assist mode takes advantage of the total size of the screen for a large and fast visual confirmation. A border outlining the display will flash once your note stays in tune longer than a pre-determined threshold.
- Multiple colour mode to customize your tuner's look + customize your bypass screen by uploading your own image through walrusaudio.io.

Product Features

- State-of-the-art tuner
- Rich graphics 2.8" TFT LCD display in full colour.
- Tune in needle and strobe modes
- Offers multiple screen orientations to fit any board layout
- Greater than ± 0.1 cent accuracy
- Flat frequency from 20Hz to 20KHz
- Tune assist mode for quick & easy tuning
- Alternate tuning presets
- Relay and buffered bypass options
- Adjustable brightness making it easy to read in various environments/
- Multiple color modes to customize your tuner's look
- Firmware updatable with USB-C via walrusaudio.io
- User-adjustable backlight brightness.
- Four different bypass modes including true bypass and buffered passthrough for maintaining high signal integrity.
- TuneAssist feature allowing for faster tuning from one string to the next.
- Offers tuning preset, capo tunings, and selectable reference pitch.
- User-selectable color schemes to personalize the look of the display.
- Multiple standby screen options including a user uploadable photo screensaver.
- Updatable via USB C
- Power requirements: 9V, 300mA minimum.
- Dimensions: 11.6 x 6.2 x 5x6 cm
- Made in the USA

Description

Arguably the most important pedal on your board, the Canvas Tuner ensures that your instrument is ready to sound its best with the perfect meld of versatility and precision.

Packaged in the same tough-as-nails, tour-ready enclosure as all Walrus pedals, the Tuner features a bright 2.8" TFT LCD display that can be viewed under just about any stage lighting conditions, multiple screen orientations, ± 0.1 cent accuracy, buffered or true bypass options and more. The Canvas Tuner ensures that you have the most accurate brush to paint your sonic picture.

Uncompromising Accuracy

Precise and accurate tuning you expect with ± 0.1 cent accuracy and multiple tuning presets. Tune with confidence, allowing your music to shine with clarity.

A World of Sound at Your Fingertips

With a flat frequency range spanning from 20Hz to 20KHz, the Walrus Audio Tuner is ready to handle tuning for low bass notes to high-strung acoustics. Even bassists needing that low B rumble can tune with confidence.

See the Music Come to Life

The 2.8" TFT LCD display is your window to pitch-perfection. Its crystal-clear quality ensures your tuning is always on point, even under the blazing stage lights or glaring sunlight.

Tailored to Your Preferences

Tailor your tuning experience to your liking with multiple screen orientation options and selectable Strobe or Needle tuning modes. Your preferences, your performance.

Your Aesthetic, Your Way

Match your style with ease. The Walrus Audio Tuner comes with eight color themes and multiple screen savers including a custom picture mode* allowing you to personalize your tuner to fit your unique aesthetic. *Photos can be uploaded to the tuner via walrusaudio.io.

Tune Faster with Tune Assist

Let Tune Assist guide you swiftly and accurately through your tuning process. Quick and easy tuning has never been so effortless. With Tune Assist, once your note stays in tune longer than a pre-determined threshold, a border outlining the display will flash letting you know that you are in tune and can move to the next string.

Versatile Bypass Options

Enjoy ultimate flexibility with buffered bypass which routes your audio through our clean, low-noise, high headroom audio buffer with a Total Harmonic Distortion ratio of .001%. This buffer offers a high input impedance of 1M Ohms and low output impedance of 400 Ohms to maintain the highest level of single integrity. Other available bypass modes include relay bypass, monitor mode, and pass-thru.

Customize Your Reference Pitch

Adjust the reference pitch from 390Hz to 490Hz to suit your musical needs. Precision tuning for any style of music.

Stay Current with Firmware Updates

Keep your tuner up to date with firmware updates via www.walrusaudio.io. Experience continuous improvement and new features as they become available.

Specs

- Frequency Response: 20Hz To 20kHz
- Tuning Accuracy: ± 0.1 cent
- THD: 0.001% @ 20Hz -20dBu
- 0.001% @ 1kHz -20dBu
- Noise Floor: -112dBu

- Signal To Noise Ratio: 98dB @ 1kHz
- Input Impedance: ~1M Ohms
- Output Impedance: ~400 Ohms
- Power Requirement: 9VDC, 300mA
- Bypass options:
 - True bypass via a small signal relay
 - Buffered bypass employing a high quality op amp based buffer
- Size Including Stomp/Jacks:
 - Height: 5.6 cm
 - Width: 6.2 cm
 - Depth: 11.6 cm
